

## Press release

ATS Presents New Wheel

## COMPETITION 2 impresses with Innovation

Bad Dürkheim, June 1, 2022

**ATS is expanding its portfolio: the Superior Industries brand is launching the new COMPETITION 2 alloy wheel, the first aftermarket product crafted with the innovative light-weight performance casting technology.**

Five symmetrical spoke pairs lend the COMPETITION 2 its powerful look. What's more, modern **light-weight performance casting** (LWPC) technology reduces the weight of this sleek wheel. The new ATS product in racing-black with polished lips thus clearly represents the highest level of performance.

### Technology for the future

An innovative technology ensures the unique performance of the COMPETITION 2: the special LWPC casting process gives this alloy wheel the ideal weight thanks to an innovative cooling method. The undercut minimizes the weight even more by removing material behind the spokes.

### Available soon for many premium applications

The COMPETITION 2 will launch with 19 and 20-inch sizes. The applications in 8.5 x 19 inches and 9.5 x 19 inches will fit many models – including various vehicles from PORSCHE, BMW, Mercedes-Benz, Tesla, and the VW Group.

The 20-inch sizes will be 9.0 x 20 inches and 11.0 x 20 inches. A range of vehicles from PORSCHE, BMW, Mercedes-Benz, AUDI, and VW can use the COMPETITION 2 as soon as it is launched.

Further applications are already planned.
